SSB DRY CELL

Cyclic - Deep Cycle - Starting - Stand By

- ***Ultra High Performance Genuine AGM Battery -*** Non-spillable Dry Cell
- ***Longer Service Life -*** Up to 30% more cycle life than other leading brands
- ***3 Years Commercial Warranty -*** Australia's Longest Warranty on Deep-Cycle Batteries
- ***Powerful Cranking Power -*** Up to 30% more cranking amps than other brands
- ***State-Of-The-Art Thermal Management System -*** Keeps battery cool during charging & general use making it better suited to hotter climates (like Australia's top end) and under bonnet use
- ***Extreme Vibration Resistant***
- ***Special Cycle Alloy -*** Extends the life of the battery, reduces self discharging and improves true deep discharge performance
- ***Absorbed Glass Matt Separators (AGM)***
- ***Extra Thick Plates -*** For increased capacity
- ***Superior Design & Quality -*** Manufactured to Quality Assurance Standard ISO 9001
- ***Manufactured to comply with AS 4029.2-2000***
- ***Australia's Premium AGM Deep-Cycle / Starting Battery***
- ***Rated for Under Bonnet Use*** - Warranty covers under bonnet use
- ***Flame Retardant ABS Plastic -*** Making it the safest available in Australia
- ***When Failure is not an Option -*** Insist on SSB DryCell Batteries

AUSTRALIAN OWNED & OPERATED

Australia's Best AGM Deep-Cycle / Starting Batteries

For those enthusiasts who expect even more, we introduce the Ultimate in High Performance batteries that were built for the most discriminating buyer who is looking for only the Best. This Ultra High Performance range is a Genuine AGM Battery that features unrivalled power & durability and is a true All Rounder. Not only can it be used as a deep-cycle battery, it can also be used as a starting battery or for backup power supply.

We claim SSB DryCell to be the best starting / deep cycle battery in Australia. These batteries are completely sealed and can be used upside down or on their side and is the only AGM battery in Australia (that we know of) that is made using Fire-Retardant ABS Plastic making it the safest and most reliable battery available. It does not emit gases and can be used in enclosed spaces.

Unlike most other AGM brands, SSB DryCell Batteries are suitable for under bonnet use meaning that they can also be used in cars, 4WD's, motor homes, trucks, buses and commercial equipment. They are also the perfect choice for dual battery systems, caravans, boats and even camping. The fine print of almost all other AGM brands exclude under bonnet use. Whether you use SSB DryCell batteries as a starting battery, deep-cycle battery, marine battery, back-up power supply battery or a combination of any of the above, our 3 Years National Replacement Warranty is unconditional of use.

We use cutting edge technology to ensure that SSB DryCell batteries not only outperform other brands but also remain in a class of its own. Some of this technology includes using a special alloy that significantly increases cycle life and allows the battery to be deeply discharged not to mention the state-of-the-art Thermal Management System that keeps the battery cool especially during charging thus increasing the life of the battery and making it better suited to hotter climates like in Australia's top end.

We also use unique fluid displacement technology to stop separation of fluid from the plates which is caused by vibration and prevents overheating of the battery. This increases the cycle & service life of the battery even further and makes them extremely resistant to vibration.

Whether you are looking for a multi-purpose battery, a starting battery, deep-cycle battery or marine battery, SSB DryCell will outlast and outperform almost any other brand available.

SSB has made many different batteries over the years, however the SSB DryCell range has been one of the most successful yet. This battery is literally so good that many of our competitors have attempted to copy us with only limited success.

Developed here in Australia, the SSB DryCell range has been engineered to meet the rigorous demands of the modern performance vehicle/equipment and it is truly in a class of its own.

When failure is not an option, insist on SSB DryCell.
